

HIGH SPEED CLUSTERS

TotalCAE Clusters are complete turnkey High Performance Computing appliances tuned for your engineering applications and completely managed around-the-clock in your data center by TotalCAE professionals.

Through our partnership with major FEA/CFD solver companies, TotalCAE provides complete white-glove IT support for the appliance and your entire engineering applications portfolio. Our on-shore IT professionals are available via email, chat, web, and telephone with 24x7 support.

TotalCAE is the single support contact for the entire cluster appliance top to bottom including all hardware, software, engineering applications, web portal, schedulers, everything is included. We draw a dotted line around the solution and are completely responsible for everything required to get your simulation completed quickly and efficiently.

TotalCAE unlimited support is month to month with measured service level agreements and no lock-in.

Managed in your data center by dedicated TotalCAE IT professionals.

Easy to use portal interface increases engineering productivity and gets results faster.

Support for all FEA/CFD solvers, license management, engineering applications, and cluster software included.
